Key Switches

Simple Solution for Exit, Door Release, Mechanical Override or Reset

MEC key switches are often used to control electric locks, shunt or activate security panels, or any similar requirements. They are compatible virtually with any system, and offer a secure and economic access control for a variety of applications.

Standard Features

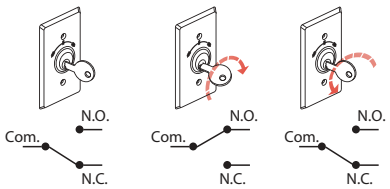
- Easy to install and maintain
- Stainless steel faceplate
- Optional surface back boxes & cylinders

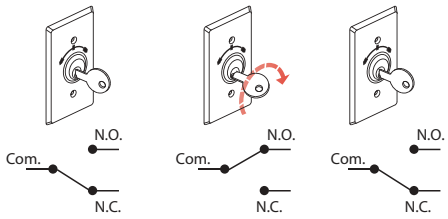
Standard Options

- Momentary or alternative switch
- 12 to 24VDC bi-color LED available

Alternate (Maintained) Action

Turning the key left or right actuates and latches the contact. Contact position is maintained until the key is inserted and turned again.



Momentary Action


Turning the key left or right momentarily actuates the contact.
